

LOOKLIVE

Looklive is looking for fashion addicts

Looklive contextualizes popular media with shoppable content

Looklive builds smart technology that identifies products in videos and images. While we're building the Artificial Intelligence, we need the smartest computers on the planet to set the example and fill the gaps. That smartest computer to date is you!

Our team of content editors shows the AI how to find the most exotic items in scenes from shows, music videos and paparazzi pictures. Don't worry, a computer won't be able to fully replace the human mind for a number of years, so we'll be needing you for a while.

As a content editor at LookLive you identify products in scenes and appearances. You use our software to guide you through the process and will soon become an expert in optimizing it to make it more efficient. You use your internet, fashion and media knowledge to quickly publish new material to LookLive.com and our b2b partners.

We are looking for **content editors** who:

- Live for fashion
- Have set world records in speed browsing
- Spend millions in online shopping
- Are addicted to television shows and celebrities

You have:

- A professional attitude to work
- A fun personality
- High quality standards

We offer:

- A great team
- Monthly bbq's
- A competitive salary
